

Dis is How We Connect!

TTWiFi is Now Available

TTWiFi is an initiative of the Government of the Republic of Trinidad and Tobago (GoRTT) to provide free Wi-Fi access to the public. It is part of the government's vision to provide free and easy access to broadband Internet in public spaces. This initiative is intended to facilitate enhanced productivity, as well as access to government services.

The Telecommunications Authority of Trinidad and Tobago (TATT) is responsible for the rollout of government's TTWiFi initiative in public libraries, waiting areas at public transport hubs, waiting areas at hospitals, district health facilities and health centres. Roll out of the TTWiFi service recently started in public primary schools that were without connectivity.

TATT utilises its universal service fund (USF) to cover the cost of providing TTWiFi service, which is implemented by Internet service providers.

The USF consists of TATT contributions and contributions from providers of telecommunications, in accordance with the Telecommunications Act and Telecommunications (Universal Service) Regulations 2015.

TATT is keen on completing the rollout of TTWiFi services at all designated locations by December 2022.

For more information on the progress of the TTWiFi services rollout, as well as all other universal service initiatives undertaken by TATT, please visit our website at www.tatt.org.tt/UniversalService.aspx.

Universal service initiatives are aimed at improving public access to telecommunications, in particular broadband Internet access.

TTWiFi is available at the following locations.

Public Transportation Hubs
