

# Market Data Forms

Annex II

This document supplements the Document on the Market Data Forms. It highlights the proposed changes to the definitions contained within the Forms and as such should be used together with the said Document.

### Form A1/A2

Relevant Form	Definition – 1 <sup>st</sup> Round Consultation	Definition – 2 <sup>nd</sup> Round Consultation	Final
A1/A2	<p><b>Number of persons employed</b>, by service refers to the total number of persons employed by the concessionaire for the provision of telecommunications and/or broadcasting services. Persons employed should be provided for each service provided by the concessionaire.</p> <p>Persons employed should be calculated as Full-Time Equivalent (FTE) employees. The operator shall utilize its definition of a full time and part time worker. A full-time person is counted as one FTE while a part-time worker is counted as a proportion to the hours worked. For example, a part-time worker employed for 20 hours a week where full-time work consists of 40 hours, is counted as 0.5 FTE.</p>	<p>No change.</p> <p>Persons employed should be calculated as Full-Time Equivalent (FTE) employees. The data is measured at the incoming</p>	<p><b>International Data Bandwidth in Mbits/s</b> refers to the average usage of all international links including fiber-optic cables, radio links and traffic processed by satellite ground stations and teleports to orbital satellites (expressed in Mbit/s). All international links used by all types of operators, namely fixed, mobile and satellite operators should be taken into account. The average should be calculated over the 12-month period of the reference year. For each individual international link, if the traffic is asymmetric, i.e. incoming traffic is not equal to outgoing traffic, then the higher value out of the two should be provided. The combined average usage of all international links can be reported as the sum of the average usage of each individual link.</p>

Relevant Form	Definition – 1 <sup>st</sup> Round Consultation	Definition – 2 <sup>nd</sup> Round Consultation	Final
	capacity of all Internet exchanges offering international bandwidth. Data should be provided as at end of December for the year specified.	(downlink) capacity of all Internet exchanges offering international bandwidth.  The average should be calculated over the 12-month period of the reference year.	<b>Total lit/equipped international bandwidth capacity</b> refers to the total lit/equipped capacity of international links, namely fiber-optic cables, international radio links and satellite uplinks to orbital satellites in the end of the reference year (expressed in Mbit/s). If the traffic is asymmetric (i.e. incoming traffic and outgoing traffic is not equal), then the higher value out of the two should be provided.
A1/A2	<b>Domestic Internet Bandwidth</b> refers to the total used capacity of domestic Internet bandwidth, in megabits per second (Mbits/s). This refers to the portion of contracted or purchased capacity that is actually used to carry traffic. Data should be provided as at end of December for the year specified.	<b>Domestic Internet Bandwidth</b> refers to the <b>average</b> used capacity of domestic Internet bandwidth, in megabits per second (Mbits/s). This refers to the portion of contracted or purchased capacity that is actually used to carry traffic. The average should be calculated over the 12-month period of the reference year.	<b>Domestic Internet Bandwidth</b> refers to the average used capacity of domestic Internet bandwidth, in megabits per second (Mbits/s). This refers to the portion of contracted or purchased capacity that is actually used to carry traffic. The average should be calculated over the 12-month period of the reference year.
A1/A2	<b>Domestic Internet traffic</b> refers to the average volume of traffic, expressed in gigabits per second (Gbit/s), exchanged over public Internet exchange. Where the incoming traffic differs from the outgoing traffic, the incoming traffic should be provided. Data should be provided as at end of December for the year specified.	<b>Domestic Internet traffic</b> refers to the <b>average</b> volume of traffic, expressed in gigabits per second (Gbit/s), exchanged over public Internet exchange. Where the incoming traffic differs from the outgoing traffic, the incoming traffic should be provided. The average should be calculated over the 12-month period of the reference year.	<b>Fixed (wired)-broadband Internet traffic (exabytes)</b> refers to traffic generated by fixed-broadband subscribers, measured at the end-user access point. It should be measured by adding up download and upload traffic. Wholesale traffic, walled-garden traffic and IPTV and cable-TV traffic should be excluded.  <b>Mobile-broadband Internet traffic (within the country)</b> refers to broadband traffic volumes originated within the country from 3G networks or other more advanced mobile networks, including 3G upgrades, evolutions or equivalent standards in terms

Relevant Form	Definition – 1 <sup>st</sup> Round Consultation	Definition – 2 <sup>nd</sup> Round Consultation	Final
			of data transmission speeds. Traffic data should be collected and aggregated at the country level for all 3G or more advanced mobile networks within the country. Download and upload traffic should be added up and reported together. Traffic should be measured at the end-user access point. Wholesale and walled-garden traffic should be excluded. The traffic should be reported in exabytes.
A1/A2	<b>Number of Fixed Telephone faults</b> refers to the total number of reported faults that result in a customer’s service being unusable. Faults that are not the direct responsibility of the concessionaire should be excluded (for example extreme weather conditions).	To be reported quarterly.	Indicator Deleted.
A1/A2	<b>Number of Fixed telephone faults cleared by next working day</b> refers to the number of reported faults that have been repaired by the end of the next working day. Non-working days such as weekends and holidays should not be counted.	To be reported quarterly.	Indicator Deleted.
A1/A2	<b>Number of mobile cellular unsuccessful calls</b> refers to the total number of unsuccessful mobile-cellular call attempts in the given year. An unsuccessful call is a call attempt to a valid number, while in a coverage area, where neither the call is answered nor called party busy tone nor ringing tone, is recognized at the access of the	To be reported quarterly.	Indicator Deleted.

	calling user within 40 seconds from the instant when the last digit of the destination subscriber number is received by the network.		
A1/A2	<b>Number of mobile cellular dropped calls</b> refers to the number of incoming and outgoing mobile-cellular calls which, once they have been correctly established and therefore have an assigned traffic channel, are dropped or interrupted prior to their normal completion by the user, the cause of the early termination being within the operator's network.	To be reported quarterly.	Indicator Deleted.
A1/A2	<b>Number of complaints received</b> refers to the number of complaints received related to the provision of telecommunications and broadcasting services regardless of validity or subject of complaint. Where a customer complains again before an existing complaint has been closed, this should not be counted as a new complaint but rather as a continuation of the first unclosed complaint. However, where the customer lodges a complaint about the same subject after the complaint has been closed this shall be counted as a new complaint. This excludes free to air radio and television providers. The number of complaints should be provided for: Fixed Telephone (A12.b_1) Mobile Cellular Telephone (A14.a_1) Fixed (Wired) Internet (A14.a_1)	<b>Number of complaints received</b> refers to the number of complaints received related to the provision of telecommunications and broadcasting services regardless of validity or subject of complaint.
