

Draft Revised Market Data Forms

Annex 2

This document supplements the Consultative document on the Draft Revised Market data forms. It highlights the proposed changes to the definitions contained within the Forms and as such should be used together with the said Consultative Document.

Form A1/A2

Relevant Form	Definition – 1 st Round Consultation	Definition – 2 nd Round Consultation
A1/A2	Number of persons employed, by service refers to the total number of persons employed by the concessionaire for the provision of telecommunications and/or broadcasting services. Persons employed should be provided for each service provided by the concessionaire. Persons employed should be calculated as Full-Time Equivalent (FTE) employees. The operator shall utilize its definition of a full time and part time worker. A full-time person is counted as one FTE while a part-time worker is counted as a proportion to the hours worked. For example, a part-time worker employed for 20 hours a week where full-time work consists of 40 hours, is counted as 0.5 FTE.	No change. Persons employed should be calculated as Full-Time Equivalent (FTE) employees. The operator shall utilize its definition of a full time and part time worker. A full-time person is counted as one FTE while a part-time worker is counted as a proportion to the hours worked. For example, a part-time worker employed for 20 hours a week where full-time work consists of 40 hours, is counted as 0.5 FTE.
A1/A2	Number of persons employed, by gender refers to the total number of persons employed by gender computed as Full Time Equivalents.	No change.
A1/A2	Investment is also known as gross capital formation and refers to investment made by the service provider for acquiring or upgrading fixed assets (usually referred to as CAPEX) less disinvestment owing to disposals of fixed assets.	No change
A1/A2	Revenue from additional services include telecommunications and broadcasting retail revenues received from providing any other telecommunications	No change

Relevant Form	Definition – 1 st Round Consultation	Definition – 2 nd Round Consultation
	and broadcasting services to end users unaccounted for in the other forms. Wholesale revenues and interconnection revenues should be excluded. Please insert the names of the services offered by the organisation.	
A1/A2	Interconnection Revenues refers to wholesale revenues received from service providers for the provision of interconnection services.	No change
A1/A2	Total equipped capacity of public switching exchanges refers to the maximum number of fixed-telephone lines that can be connected. This measures the actual capacity of the system and includes fixed-telephone lines already connected and fixed lines available for future connection, including those used for technical operation of the exchange (test numbers). Data should be provided as at end of December for the year specified.	No change
A1/A2	Public Wireless Local Area Networks (PWLAN) access points refers to the number of PWLAN access points offered by the service provider where users can access the Internet using IEEE 802.11-based wireless technology. These are commonly referred to as Wi-Fi hotspots.	No change
A1/A2	Number of Homes passed by cable TV refers to the number of households that have a access to cable television, whether or not they are subscribing to the service or not. This measures the potential ability of	No change

Relevant Form	Definition – 1 st Round Consultation	Definition – 2 nd Round Consultation
	households to access cable television services through the availability of a coaxial cable television outlet. Data should be provided as at end of December for the year specified.	
A1/A2	International Data Bandwidth in Mbits/s refers to the total used capacity of international Internet bandwidth, in megabits per second (Mbit/s) and should be provided as follows: International outgoing Internet Bandwidth in Mbits/s refers to the total outgoing used capacity of International Internet Bandwidth, in Mbit/s. The data is measured at the outgoing (uplink) capacity of all Internet exchanges offering international bandwidth. Data should be provided as at end of December for the year specified. International incoming Internet Bandwidth in Mbits/s refers to the total incoming used capacity of International Internet Bandwidth, in Mbit/s. The data is measured at the incoming (downlink) capacity of all Internet exchanges offering international bandwidth. Data should be provided as at end of December for the year specified.	International Data Bandwidth in Mbits/s refers to the average used capacity of international Internet bandwidth, in megabits per second (Mbit/s) and should be provided as follows: International outgoing Internet Bandwidth in Mbits/s refers to the average outgoing used capacity of International Internet Bandwidth, in Mbit/s. The data is measured at the outgoing (uplink) capacity of all Internet exchanges offering international bandwidth. The average should be calculated over the 12-month period of the reference year. International incoming Internet Bandwidth in Mbits/s refers to the average incoming used capacity of International Internet Bandwidth, in Mbit/s. The data is measured at the incoming (downlink) capacity of all Internet exchanges offering international bandwidth. The average should be calculated over the 12-month period of the reference year.
A1/A2	Domestic Internet Bandwidth refers to the total used capacity of domestic Internet bandwidth, in megabits per second (Mbits/s). This refers to the portion of contracted	Domestic Internet Bandwidth refers to the average used capacity of domestic Internet bandwidth, in megabits per second (Mbits/s). 	or purchased capacity that is actually used to carry traffic. Data should be provided as at end of December for the year specified.	purchased capacity that is actually used to carry traffic. <i>The average should be calculated over the 12-month period of the reference year.</i>
A1/A2	Domestic Internet traffic refers to the average volume of traffic, expressed in gigabits per second (Gbit/s), exchanged over public Internet exchange. Where the incoming traffic differs from the outgoing traffic, the incoming traffic should be provided. Data should be provided as at end of December for the year specified.	Domestic Internet traffic refers to the <i>average</i> volume of traffic, expressed in gigabits per second (Gbit/s), exchanged over public Internet exchange. Where the incoming traffic differs from the outgoing traffic, the incoming traffic should be provided. <i>The average should be calculated over the 12-month period of the reference year.</i>
A1/A2	Number of Fixed Telephone faults refers to the total number of reported faults that result in a customer's service being unusable. Faults that are not the direct responsibility of the concessionaire should be excluded (for example extreme weather conditions).	<i>To be reported quarterly.</i>
A1/A2	Number of Fixed telephone faults cleared by next working day refers to the number of reported faults that have been repaired by the end of the next working day. Non-working days such as weekends and holidays should not be counted.	<i>To be reported quarterly.</i>
A1/A2	Number of mobile cellular unsuccessful calls refers to the total number of unsuccessful mobile-cellular call attempts in the given year. An unsuccessful call is a call attempt to a valid number, while in a coverage area, where neither the call is answered nor called party busy tone nor ringing tone, is recognized at the access of the calling user within	<i>To be reported quarterly.</i>

Relevant Form	Definition – 1 st Round Consultation	Definition – 2 nd Round Consultation
	40 seconds from the instant when the last digit of the destination subscriber number is received by the network.	
A1/A2	Number of mobile cellular dropped calls refers to the number of incoming and outgoing mobile-cellular calls which, once they have been correctly established and therefore have an assigned traffic channel, are dropped or interrupted prior to their normal completion by the user, the cause of the early termination being within the operator's network.	To be reported quarterly.
A1/A2	Number of complaints received refers to the number of complaints received related to the provision of telecommunications and broadcasting services regardless of validity or subject of complaint. Where a customer complains again before an existing complaint has been closed, this should not be counted as a new complaint but rather as a continuation of the first unclosed complaint. However, where the customer lodges a complaint about the same subject after the complaint has been closed this shall be counted as a new complaint. This excludes free to air radio and television providers. The number of complaints should be provided for: Fixed Telephone (A12.b_1) Mobile Cellular Telephone (A14.a_1) Fixed (Wired) Internet (A14.a_1) Fixed (Wireless) Internet (A14.a_2) Mobile Internet {includes handset based Internet as well as computer based such as dongles} (A14.a_3) Multichannel (A15.a)	Number of complaints received refers to the number of complaints received related to the provision of telecommunications and broadcasting services regardless of validity or subject of complaint. 		To be reported quarterly.
A1/A2	Content Complaints Received refers to the number of complaints received related to the broadcast content of the concessionaire. Applicable to FTA Radio and Television providers only.	To be reported quarterly.
A1/A2	Content Complaints Resolved refers to the number of content complaints resolved. Applicable to FTA Radio and Television providers only.	To be reported quarterly.
A1/A2	Technical Complaints Received refers to the number of complaints received related to the technical quality of the service that directly affects the delivery of the broadcast to the customer. Applicable to FTA Radio and Television providers only.	To be reported quarterly.
A1/A2	Technical Complaints Resolved refers to the number of complaints resolved. Applicable to FTA Radio and Television providers only.	To be reported quarterly.

Form Q1

Relevant Form	Definition – 1 st Round Consultation	Definition – 2 nd Round Consultation
Q1	Number of Bundled Telecommunications Subscriptions refers to the subscriptions meeting all the following criteria: (a) A commercial offer that includes two or more of the following services: fixed telephone, fixed broadband, multichannel TV; and (b) marketed as a single offer, with a single invoice and with a single price for the set of services; and (c) subscribed to under conditions that cannot be obtained by adding single play offers together.	Number of Bundled Telecommunications/Broadcasting Subscriptions refers to the subscriptions meeting all the following criteria: (a) A commercial offer that includes two or more of the following services: fixed telephone, fixed broadband, multichannel TV; and (b) marketed as a single offer, with a single invoice and with a single price for the set of services; and (c) subscribed to under conditions that cannot be obtained by adding single play offers together.

Form R1 and T1

Relevant Form	Definition – 1 st Round Consultation	Definition – 2 nd Round Consultation
R1 and T1	Total Gross Revenues refers to the total revenues of the company exclusive of VAT and excise taxes but inclusive of corporate taxes. Components of Gross Revenues include: (a) <u>Advertising</u> - revenues derived from the sale of designated commercial time slots (inclusive of time slots, headline sponsorship, production charge etc.). Advertising revenues shall be broken down in to revenues received from agencies, directly from customers as well as from Political advertising*. <i>Political advertising revenues may include agency or non-agency advertising.</i> (b) <u>Programme Sales</u> - revenues derived from the sale of primary programming airtime to a third party content provider, where applicable. (c) <u>Sales/Promotion</u> - revenues derived from the auxiliary services related to the company's operation (inclusive of promotion of events, ticket give-aways, sale of merchandising and paraphernalia), where applicable. (d) <u>Donations</u> - donations received for the operations of the business, where applicable. (a) <u>Other</u> - All other revenues received for broadcasting services, where applicable.	No change

R1 and T1	* The definition for Political advertng shall be guided by the Trinidad and Tobago Bureau of Standards - TTS 94-1, Advertising - Part 1: General Requirements. "advertising, with the main purpose of influencing public opinion, that includes or pertains to: a) government policies, plans, programmes and achievements; b) election advertising; or c) lobby groups, including unions and business leaders	No change
R1 and T1	Total advertising minutes refer to the average number of advertising minutes per month.	No change

Form I1

Relevant Form	Definition – 1 st Round Consultation	Definition – 2 nd Round Consultation
I	International incoming fixed telephone traffic, in minutes refers to the number of incoming minutes (originating outside the country) and destined for termination on a domestic fixed network, irrespective of whether the call was from a fixed or mobile subscriber. The data should be provided for each category listed.	International incoming fixed telephone traffic, in minutes refers to the number of incoming minutes (originating outside the country) and destined for termination on a domestic fixed network, irrespective of whether the call originated from a fixed or mobile subscriber. The data should be provided for each category listed. List of countries provided. Number of categories reduced on Form I.

P1 and P2	Prices should be provided Vat exclusive.	No Change

Form F1

Relevant Form	Definition – 1 st Round Consultation	Definition – 2 nd Round Consultation
F1	Fixed Voice Subscriptions refer to the number of active fixed voice subscriptions. Active* subscriptions include subscriptions that have registered an activity in the past three months. <i>*Active subscription:</i> - where subscribers do not pay a recurring monthly fee: only those subscriptions that have been used at least once in the last three months for making or receiving a call should be counted - where subscribers pay a recurring monthly fee: all activated subscriptions should be counted, regardless of use.	No Change
F1	Residential Subscriptions refer to the total number of subscriptions serving households.	No Change
F1	Business Subscriptions refer to the total number of subscriptions serving businesses, government, institutions such as schools, libraries etc., or other professional purposes and Systems subscriptions to multiple lines or extensions running from a PBX.	No Change
F1	<u>PSTN</u> refers to the number of active lines connecting subscribers' terminal equipment to the PSTN.	No Change
F1	<u>VoIP subscriptions</u> refers to the number of voice-over-Internet protocol (VoIP) fixed-line subscriptions and includes VoIP subscriptions through fixed wireless, DSL, cable, fibre optic and other fixed-broadband Internet platforms that provide fixed telephony using IP. This excludes software-based VoIP applications such as Skype.	No Change

Relevant Form	Definition – 1 st Round Consultation	Definition – 2 nd Round Consultation
F1	<u>Fixed wireless local loop (WLL) subscriptions</u> refers to the number of fixed voice subscriptions provided by concessionaires that provide ‘last-mile’ access to the subscriber using radio technology and where the subscriber’s terminal equipment is either stationary or limited in its range of use.	No Change
F1	<u>Basic-rate ISDN subscriptions</u> refers to the number of subscriptions to the integrated services digital network (ISDN) basic-rate interface service.	No Change
F1	<u>Primary-rate ISDN subscriptions</u> refers to the number of subscriptions to the integrated services digital network (ISDN) primary-rate interface service.	No Change
F1	Fixed Public Telephones refers to the number of working payphones that are available to the public using the fixed network. This includes coin and card payphones as well as the number of pay public telephones at Community access centres.	No Change
F1	Gross Revenues from Domestic Fixed Voice Services refers to retail revenues from the provision of fixed-telephone services. It excludes wholesale revenues, revenues received from payphones and interconnection revenues.	No Change
F1	Connection/Installation revenues refer to the one-off revenues collected from the installation of basic telephone service.	Connection/Installation revenues refer to total revenues collected from the installation of basic telephone service.
F1	Reconnection revenues refer to the one-off revenues collected from the reconnection of a basic telephone service that had been previously disconnected.	Reconnection revenues refer to total revenues collected from the reconnection of a basic telephone service that had been previously disconnected.

Relevant Form	Definition – 1 st Round Consultation	Definition – 2 nd Round Consultation
F1	Subscription revenues refer to revenues generated from domestic call charges, excluding interconnection charges. This should be broken down into revenues received from fixed to fixed domestic calls and fixed to mobile domestic calls.	Subscription revenues refer to total revenues generated from domestic call charges, excluding interconnection charges. This should be broken down into revenues received from fixed to fixed domestic calls and fixed to mobile domestic calls.
F1	Revenues Received Payphones refers to gross revenues received from public payphones.	No Change
F1	Fixed Value added service revenues refer to the revenues derived from optional services offered by the operator beyond the basic telephone service line rental and calls such as call waiting, caller id etc.	No Change
F1	Other revenues refer to any other revenues the service provider may collect from the provision of fixed line services. Please detail the composition of these revenues.	No Change
F1	Connection/Installation fee refers to the one-off charge paid per customer for subscribing to the basic telephone service. This figure should be VAT exclusive and provided for each category of subscriptions requested.	Connection/Installation fee refers to the price charged per customer for connecting or installing the basic telephone service. This figure should be VAT exclusive and provided for each category of subscriptions requested.
F1	Reconnection fee refers to the one-off charge paid per customer for reconnecting basic telephone service. This figure should be VAT exclusive and provided for each category of subscriptions requested.	Reconnection fee refers to the price charged per customer for reconnecting the basic telephone service . This figure should be VAT exclusive and provided for each category of subscriptions requested.
F1	Monthly Subscription fee refers to the recurring monthly price paid per customer for subscribing to the basic telephone service. This figure should be VAT exclusive and provided for each category of subscriptions requested.	Monthly-Subscription fee refers to the price charged per customer for using the basic telephone service . This figure should be VAT exclusive and provided for each category of subscriptions requested.

F1	Number of Domestic Fixed Voice Minutes refers to the total number of domestic minutes*.	No Change
F1	*Inter call refers to a call that moves from one exchange to another exchange. Intra call refers to a call that stays with the same exchange.	No Change

Form M1

Relevant Form	Definition – 1 st Round Consultation	Definition – 2 nd Round Consultation
M1	Mobile-cellular Telephone subscriptions refer to the number of subscriptions to mobile voice (and SMS) services of the service provider. Mobile cellular subscriptions can be broken down by prepaid and post-paid subscriptions, as defined below.	No Change
M1	Prepaid mobile cellular Telephone subscriptions refer to the number of active¹ mobile-cellular subscriptions using prepaid cards. These are subscribers that rather than paying a fixed monthly subscription fee, choose to purchase blocks of usage time. ¹Active subscriptions refers to those subscriptions that have been used at least once in the last three months for making or receiving a call or carrying out a non-voice activity such as sending or reading an SMS or accessing the Internet.	No Change
M1	Post-paid mobile-cellular Telephone subscriptions refer to the number of activated mobile-cellular telephone subscriptions paying a monthly subscription fee after use of their mobile services. Activated subscription refers to subscriptions that are able make or receive a voice call and/or SMS message.	No Change

Relevant Form	Definition – 1 st Round Consultation	Definition – 2 nd Round Consultation
M1	The number of Mobile cellular Telephone subscriptions with Mobile Internet access refers to the number of mobile subscriptions with access to mobile Internet services. This should be broken down into Narrowband and Broadband Internet access and further sub-divided into prepaid and post-paid subscriptions. Narrowband Internet access refers to an advertised data speed of 256 Kbit/s or less whereas Broadband Internet access refers to an advertised data speed of 256 Kbit/s or greater. This indicator refers to the theoretical ability of subscribers to use mobile data services, rather than the number of active users of such services. This indicator measures Mobile Internet accessibility.	No Change
M1	Active Mobile Internet subscriptions refer to the number of mobile subscribers who use mobile Internet Services. This should be broken down into narrowband and broadband mobile Internet subscribers and further sub-divided into Standard² and Dedicated³ subscribers. This Indicator covers actual subscribers, not potential subscribers, even though the latter may have Internet enabled-handsets. Standard SMS and MMS messaging do not count as active Internet data connections, even if they are delivered via IP. This Indicator measures Mobile Internet usage. <i>Narrowband Internet refers to an advertised data speed of 256 Kbit/s or less whereas broadband Internet refers to an advertised data speed of 256 Kbit/s or greater.</i>	Active Mobile Internet subscriptions refer to the number of mobile subscribers who use mobile Internet Services.
