Notes

1. Penetration rates have been calculated using the Central Statistical Office figures as follows:
 - a) 1,367,764 - 2025 Mid-year population estimate
 - b) Number of households - 401,382 (Trinidad and Tobago 2011 Population and Housing Census Demographic Report, Central Statistical Office)
2. Average Revenue Per User (ARPU) is calculated for each quarter using total quarterly revenues divided by subscriptions.
3. The change in Fixed Internet subscriptions reported for the first quarter of 2026 reflects a data validation and clean-up exercise undertaken by one of the reporting operators. Accordingly, the reported change should not be interpreted as an actual change in market activity.
4. Fixed Internet revenues for Q1 2025 to Q4 2025 have been revised following the resubmission of data by an operator.
